Gold Coin: The Salient Futures Contract of IME

Futures Trading

The clearing house operates as the central counterparty (CCP) of every trade keeping anonymity of the clients ensuring sound, clearing and settlement process. Trading commences dynamically via pre-opening auction. After matching of the bid and ask orders are placed electronically in queues waiting to match to their identical prices. Trading commences dynamically via pre-opening auction. After matching of the bid and ask orders, the clearing house imposes collaterals on the buyer to ensure payment in due course. Seller shall receive money from the clearing house within the period specified in the notice of offering.

Futures Market Facts:

Gold Coin: The Salient Futures Contract of IME

Facts of 2013

The gold coin futures contract was launched in 2008 and since then the number of market participants has been increasing on a monthly basis. The clearing house operates as the central counterparty (CCP) of every trade keeping anonymity of the clients ensuring sound, clearing and settlement process. A Sicherungsverpflichtung (Sicherungsverpflichtung) is calculated and announced to the market by the clearing house for settlement of the contract thereby offsetting the risky accounts. The C/H margin calls the clients whose margin accounts fall below the maintenance level so they are required to bring the amount of their margin account back to the initial margin level. The clearing house imposes collaterals on the clients whose margin accounts fall below the maintenance level so they are required to bring the amount of their margin account back to the initial margin level. At the end of the contract month those clients who areawan in physical delivery of the underlying asset may take or make delivery of the commodity subject of the contract and the contract is terminated at the end of the last trading day and post-trade process begins.
